# **In Conclusion (Town Council's perspective)**

We are very positive with our attitude to working with the Principal Authorities, when I first joined the town council I was given a booklet which was headed three-way working. Until quite recently there was a divide between the three tiers, and it was understood that even at central government level, Local Government meant District & County (Borough) and Unitary and everything hinged on those, now the words Town and Parish Councils are being recognised as being very important parts of Local Democracy, who can and do provide good services when given the opportunity to do so.

# In Conclusion (District perspective)
