

JANUARY 2020

CALNE TOWN COUNCIL, WILTSHIRE

Calne Against Climate Change (CACC) is a local group campaigning for action to tackle the unfolding of climate catastrophe. Our aim is to help Calne reach 'net zero' carbon by 2030.

Having a net zero carbon footprint, means balancing carbon emissions with carbon removal or simply eliminating carbon emissions altogether (the transition to a 'post-carbon economy')

This is a challenge for all of us. It needs global action and action by world governments, local government and business as well as by individuals. We believe we can make a real difference at the local level: right here in Calne.

And it's not all bad news; we know we have the technology to help us reach net zero carbon emissions. If we can improve on this along the way, all the better.

Some of the things CACC are doing:

- Supporting the Mayor's and Town Council's zero carbon initiative, following declaration of a Climate Change Emergency for Calne.
- Working to find affordable renewable energy sources for the town.
- Working for improved air quality and less traffic congestion.
- Helping develop a zero carbon strategy suited to a small rural economy.

Has your council done something similar? If so, please contact NALC through the email address: Claire.goldfinch@nalc.gov.uk
